

ClickDeploy.io

Partner

We built ClickDeploy to provide the fastest and easiest solution for any Salesforce customer to build and deploy innovation from the Salesforce platform. With this new partnership with the Enterprise leader in Salesforce DevOps we will now be able to deliver the most comprehensive solution available for Salesforce customers of any size.

Because every Salesforce customer is looking for ways to release new functionality faster with higher quality and trust, it is more important than ever for our customers to have access to the widest range of DevOps solutions available to support them in their Salesforce DevOps journey. Our focus on simple and secure solutions at the best price points in Salesforce will not waiver. With this new partnership, we will not only expand our Freemium offering utilized by thousands of Salesforce Admins and developers, we will continue to expand our core solutions for small and mid sized teams who need to move 10X faster than Change Sets with a modern release process that's available in minutes. Additionally, for our more sophisticated customers, we will now be able to offer the #1 Native Devops platform from Copado. As part of the Partnership, we are working closely with the technology teams at Copado to provide interoperability between the two products and share Salesforce best practices.

Our goal is to provide the highest quality options for our customers and the Salesforce ecosystem. Together we are moving faster than ever before and the need to move fast with high quality remains ClickDeploy's highest priority. The innovation and power this partnership unlocks for ClickDeploy and Copado customers and the entire Salesforce ecosystem.
